(54) METHOD AND SYSTEM FOR EVALUATING PRODUCTION PLANNING

(57)Abstract:

PROBLEM TO BE SOLVED: To select overall evaluation of production planning and optimum production planning by presenting a plurality of highly accurate indexes in a plurality of pieces of prepared production planning.

SOLUTION: In this method for evaluating whether or not production planning of a plant is efficient, a plant model on a computer is used to perform virtual production that imitates real devices of the plant, and virtual production results are made indexes to be used to evaluate production planning.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
